

Hello,

For the year 2014 is ending, I would like to contact you all to wish you a merry Christmas and a very happy new Year. I also hope that everything is ok, or nearly ok and that your FD doesn't make too much trouble.

I know, I'm not often in the group, I'm not the activist member :-(but at the moment I'm nearly only thinking in finishing my medicine studies after I have already finished my dental studies. In Germany you must be a dental surgeon and a general medical before you get the permission to specialise in maxillo facial surgery. That's a very long way and I hope to finish in 2 years. Now I'm in the clinical part, the practical and last part before the big last exam. I want to earn my own money because, at the moment, I still depend on the support of my parents. I'm looking forward to earn money and to found an own family with my friend Sarah.

Unfortunately I have the same problems with my study on FD as many other scientifics have too: I need much more time than I had planned and hoped before. The ethical commission has already given green light, but the changes, they want to have, must be programmed and now I depend on the programmer. For my study runs beside his own work, I must be patient, patient, patient.

I hope till soon;

best regards

Christoph from Germany
